ABOUT US.

Founded in 2002, Amron Architectural are specialists in architectural metal solutions. We supply woven and expanded meshes, perforated and profiled sheets, and bespoke metal curtains in high-end finishes that bring colour, texture, and detail to any project. Our systems, spanning ceilings, wall cladding, and façades are designed for performance, ease of installation, and design flexibility. We work across commercial, residential, and hospitality sectors, delivering everything from standout interiors to large-scale façades.

Our role goes beyond supply. We support architects and designers at every stage of the design and specification process, offering technical advice, drawings, and project-specific solutions. Innovation, sustainability, and quality drive everything we do, keeping us at the forefront of architectural metal solutions and helping clients bring bold ideas to life with confidence.
